- UX Design Lead  
**Delhivery Ltd., India**  
Sept 2023 – Now

🏆 Agentic Hackathon – Delhivery, 2026

🏆 Spotlight – 23

🏆 Star performer - 23
- Leading the design function as the senior-most design leader, directing and mentoring a 6-member team responsible for experience strategy, design execution, and design excellence across the organisation.
  - Driving end-to-end UX transformation initiatives for Delhivery's Transportation and Warehousing businesses, supporting revenue streams of approximately ₹9,000 Cr and ₹3,000 Cr respectively.
  - Spearheading the design of scalable digital solutions that are enhancing operational efficiency, workflow effectiveness, & user experiences across logistics & supply chain ecosystems.
  - Collaborating closely with business, product, and engineering stakeholders to translate complex operational requirements into intuitive, high-impact digital experiences.
  - Immersing in on-ground operations by shadowing delivery partners, riders, & warehouse personnel to uncover user pain points & identify experience improvement opportunities rooted in real-world insights.
  - Transforming field observations into scalable product interventions that are improving usability, adoption, & efficiency for thousands of users across Delhivery's operational network.
  - Contributing to the organisation's design maturity by establishing user-centred design practices and driving experience-led decision-making across business-critical platforms.
- Sr. UX Manager  
**Jio Platform (Reliance)**  
Feb 2022 - Aug 2023

🏆 Design Nerd
- Played a pivotal role within Reliance Jio's central design organisation, delivering strategic UX initiatives across multiple high-visibility digital products and business units.
  - Successfully launched JioMart DS 2.0, strengthening design consistency, scalability, and user experience standards across the platform ecosystem.
  - Orchestrated the redesign and launch of the MyJio and JioMart payment experiences, enabling streamlined customer journeys and improved transaction workflows.
  - Delivered Netmeds DS 2.0, establishing a stronger design foundation and elevating experience consistency across healthcare-focused digital touchpoints.

## Spotlight Award

- Earned the prestigious "Design Nerd 4", 2022 recognition for displaying innovation, cross-functional collaboration, creative problem-solving, and design excellence within the Jio design community.
- Distinguished performance through a results-driven approach, consistently exceeding expectations while fostering collaboration and supporting team success across initiatives.

---

## Co-Founder **Travacations Tours & Travel** Jul 2019 - Oct 2021

### Travel 6+ Countries

- Co-founded and scaled a travel venture focused on creating customer-centric travel experiences that balanced affordability, accessibility, and service quality.
- Drove product conceptualisation, customer experience design, & business development initiatives while gaining firsthand exposure to end-to-end product & business lifecycle management.
- Collaborated with startups and ecosystem partners to transform ideas into viable customer offerings, strengthening expertise in product strategy and entrepreneurial execution.
- Built a deeper understanding of customer behaviour, market dynamics, and service design principles through direct engagement with travellers and industry stakeholders.
- Expanded global perspective through travel across 6+ countries, drawing inspiration from diverse cultures, architecture, consumer behaviours, & service ecosystems to inform design thinking & innovation.
