abhishekiit2k12@gmail.com

Product Design Leader with 8+ years across logistics, telecom, e-commerce, healthcare, media, education and travel. Currently leading UX strategy for Delhivery's transportation and warehousing platforms supporting ₹12,000 Cr+ in annual revenue, simplifying complex operational systems through field research, scalable design systems and AI-led product design.

Core Competencies

Design Strategy | UX Design & Research | Data Visualization UX | Design Systems | Enterprise & Platform Design | Design Leadership

Technical Skills

Figma | Cursor | Claude | Lovable | Adobe CS | GA4 | Clarity | Mixpanel | Tableau

Product Design Lead
Delhivery Ltd, India
Sept 2023 - Present

Winner, Agentic Hackathon
2026

Lead the design function as senior-most design leader, directing 9 member team across experience strategy, execution and design system governance.

Drive end-to-end UX for Delhivery's Transportation and Warehousing businesses, supporting ₹12,000 Cr+ in annual revenue across first mile, mid mile, last mile and fulfillment.

Built and scaled Tarmac, Delhivery's design system, standardising components and tokens across transportation, warehousing and rider-facing products for faster, more consistent delivery across design and engineering.

Redesigned Last Mile Express for a ₹8,000 Cr+ network: 32% lift in digital payment usage, rider onboarding under 30 seconds, 98% pin accuracy rate.

Rebuilt mid-mile and warehouse operations across mega hubs, WMS and a rapid OMS for quick commerce: 80% improvement in hub visibility, 40% faster inbound processing, 35.5% higher pick task accuracy, 50% picker-packer productivity gain, and a 100% Road Train launch.

Ground research with riders, delivery partners, and warehouse teams drives the roadmap, turning field observations into interventions used daily across the operational network.

Sr. UX Manager
Jio Platform (Reliance)
Feb 2022 - Aug 2023

Design Nerd
2022

Spotlight Award
2022-23

Delivered strategic UX across JioMart, MyJio, and Netmeds within Reliance Jio's central design organisation, serving 100M+ users.

Redesigned the checkout experience, lifting conversion 20.54% and returning users 20.61% while cutting average page download time 29.6%.

Optimised product discovery across homepage, PLP and PDP: 51% increase in installs, 65% in monthly active users and 38% in revenue.

Rebuilt the MyJio payment experience used across 100M+ devices, reducing payment completion from 1.8 minutes to 42 seconds and driving 32% UPI adoption with 1.4x repeat transactions.

Launched JioMart DS 2.0 and Netmeds DS 2.0, and revamped Netmeds through field research: 29% higher discovery to order conversion and 38% reduction in CS tickets.

Cofounder (Product & Tech)

Travacations Tours & Travel

Aug 2019 - Dec 2021

Travel 6+ Countries

Worked on shaping the product experience for a travel-focused business, contributing across product thinking, UX, service flows, and early-stage product development. Collaborated closely with small teams to turn ideas into practical customer experiences, while balancing usability, affordability, and business needs.

During this period, I also travelled across 6+ countries, gaining broader exposure to different cultures, behaviours, and service experiences — perspectives that strengthened my empathy and approach to product design

---

Sr. UX Designer, Manager II

Times Internet Ltd

Aug 2016 - July 2019

Facebook Design Hackathon

Mega Mind Title

2017-18

Led a 6 member design team across Dineout's app, web and B2B ecosystem, scaling the platform from 10K to 10M users: 60.2% lift in CTA clicks and 41.7% improvement in the booking funnel.

Streamlined table booking to 1.5 minutes with drop-off halved and redesigned PLP/ PDP for 28% higher booking conversions and 23% lower bounce rate.

Owned the Great Indian Restaurant Festival and Predict & Win IPL campaign (3.2x participation, 48% deal redemption) and initiated the AWD design system for msite.
